

## Contributors

**Mahendra Reddy** is a renowned economist and academic in the Pacific region. He has established a reputation as one of the country's leading economists, and this reputation is widely acknowledged, in government circles and in higher education sector. Dr Reddy has researched and authored or co-authored a wide array of papers and articles that have had, and continue to have, an effect on economic policy and practice in Fiji Islands and the greater South Pacific region. In 2005, his qualities of management and leadership were recognised by his appointment as the President of the Association of the University of the South Pacific Staff, and in 2008 as Head of the School of Economics in the Faculty of Business and Economics. In October 2008, Dr Reddy joined the Fiji Institute of Technology to take up the position of the Dean of the Faculty of Commerce, Hospitality and Tourism Studies. In March 2009, recognising his capability, the Government of Fiji appointed Dr Reddy as the Chair of Fiji's Commerce Commission. Dr Reddy continues to serve in both the roles.

**Happy Siphambe** is an Associate Professor of Economics and former Head of Department of Economics at the University of Botswana. Professor Siphambe is now serving as Dean of the Faculty of Social Sciences in the University of Botswana. He specialises in labour economics and general development economics issues. His research interests are in the areas of economics of education, human resources development issues, economics of HIV/AIDS and poverty in developing countries.

**Karl Theodore** is the Director of the Health Economics Unit (HEU), Centre for Health Economics, at the University of the West Indies. He is Professor of Economics in the Department of Economics on the St Augustine Campus where he has taught health economics and supervised research in this area for many years. He has led a multidisciplinary team of professionals in producing a number of research studies, as well as technical reports for governments and for international agencies.

## Acknowledgements

The responsibility for pulling this text together was made much less onerous because of the intensive work of my colleagues, Happy Siphambe and Mahendra Reddy. Although we are from countries and regions that are separated by the oceans of the world, working together was indeed a pleasure for me. For although the issue being worked upon was undoubtedly serious and challenging, the good humour that prevailed served to keep our spirits up whenever the need arose. We would all like to thank Constance Vigilance, Economic Adviser, Economic Affairs Division – Small States, Environment and Economic Management Section of the Commonwealth Secretariat. In many ways Constance held things together and provided a great deal of helpful material when it really made a difference. We are also very grateful to Dr Michael Jennings of the School of Oriental and African Studies, University of London, for reviewing the draft study and providing valuable comments. Finally, I would like to thank Nigel Gaines for early work on the project, and the young researchers, Vyjanti Beharry and Josette McDavid, of the HEU, Centre for Health Economics at the University of the West Indies. The latter provided the team with valuable support in Trinidad and Tobago when we initiated the process of pulling together the separate pieces of the study. Our gratitude also goes out to Charmaine Metivier of the HEU, who carried out detailed editing on most of the chapters. Finally, our thanks go out to all our friends who are persons living with HIV/AIDS (PLWHAs), who kept before us the need to be relevant and fully focused in our search for a deeper understanding of the horrendous HIV/AIDS epidemic.
